

RE- INSTALLATION FOR EXISTING USERS – LIBERATE ESTIMATING EDITION 5 -

MOVING LIBERATE TO ANOTHER COMPUTER

If you are installing to a new computer and you already have a licence key:

Note PE= Personal Edition: MUC= Multi User Client edition

- Personal edition and Multi-User client. Download the latest Version from Support page at www.libr8.co.uk/support
- Multi - user server. Please request this file and your key.
- Reference your licence key from the information  button which is accessed from the Help menu and then About
- Or ask us to send you your licence key.
- Use this licence key to install your system as a Standalone - you will not have to reregister.
- Do not use your system more than 3 times in any 40-hour period times on your old machine as this will lock up both machines.
- Once you have installed Liberate on your new machine transfer the databases from your old machine to your new machine.

Personal Edition

- The databases in two folders called Jobs and Library at: -
C:\Users\user_name\AppData\Roaming\Liberate\Liberate PE. (or LiberRATE\LiberRATE PE if you have upgraded from V4)
- Copy the folders from the **old machine** and replace the folders on the **new machine**
- Please be careful not to lose your data and if you are unsure please call us.

Multi-User Version

If you don't know where your MU databases are, the databases for the multiuser version are referenced from Help/ About – Info button and would be user selected in any case when you first installed

Reinstalling a different licence key on the same computer

If you have your licence keys:

- From C:\Program files(X86) \Liberate\Liberate PE or Liberate MUC (depending which key you are installing)
- Double click to run the program CMinstall.exe
- You won't see anything happening but this wipes out your current licence.
- Start Liberate normally.
- You will be asked to Register as a Trial / Standalone or Network Client.
- Choose Standalone and Paste in the appropriate key.
- That's it!
