

Licence Key Types

If you are installing to a new computer and you already have a licence key:  
**Note PE= Personal Edition: MUC= Multiuser Client edition**

Warning

Using the same key on more than 1 PC will lock up both PC's after a few uses. We allow some duplication for emergency purposes

Download and install

Personal edition and Multi-User client. Download the latest Version from Support page at [www.libr8.co.uk/support](http://www.libr8.co.uk/support)

All editions

Reference your licence key from the information button which is accessed from the Help menu and then About  
 Or ask us to send you your licence key.

Existing databases Personal edition

The databases in two folders called Jobs and Library at: -  
 C:\Users\user\_name\AppData\Roaming\Liberate\Liberate PE.  
 (or LiberRATE\LiberRATE PE if you have upgraded from V4)

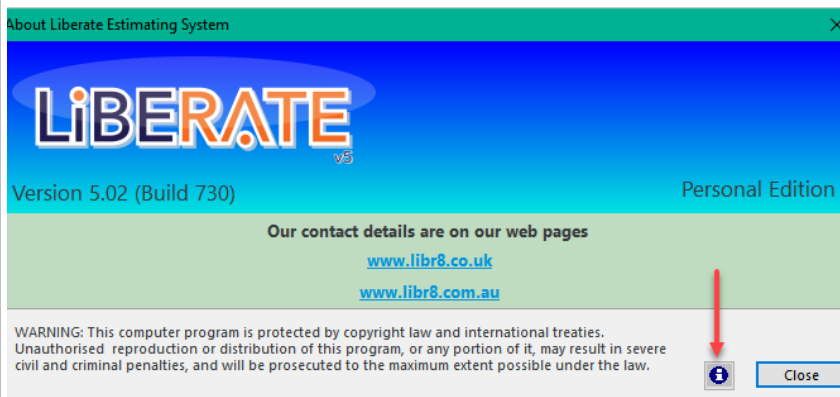

**Check the dates in each of these two locations and see which Jobs folders have the more recent dates  
 You can check the locations as per the Help file instructions below**

Copy the folders from the **old machine** and replace the folders on the **new machine**  
 Please be careful not to lose your data and if you are unsure please call us.

Existing databases

You will need to know the location of these to complete the information. Can get this from the Help about box above (Jobs or Library database path. Point at the parent directory of these when installing. in the case below - E:\Datafile\LibV4 Data

Accessing Licence info

Program Root Path	C:\Program Files (x86)\LIBERATE\Liberate5 MUC
Local Program Root Path	C:\Program Files (x86)\LIBERATE\Liberate5 MUC
Jobs Database Path	E:\Datafile\LibV4 Data\Jobs\
Library Database Path	E:\Datafile\LibV4 Data\Library\
User Settings Path	C:\Users\sam\AppData\Roaming\Liberate\Liberate MUC\Settings\
Temporary Files Path	C:\Users\sam\AppData\Local\Temp\Lib8-1
Product Code	LIBR8V5MU
Product Key	LIBR8V5MU-JHW2-14DF-00
Features Mask	00000007 (hex)

Use the parent directory here e.g. E:\Datafile\LibV4 Data\

To Install the licence

1. From C:\Program files(X86) \Liberate\Liberate PE or Liberate MUC (depending which key you are installing):-
2. Double click to run the program CMinstall.exe
3. You won't see anything happening, but this wipes out your current licence.
4. Start Liberate normally.
5. You will be asked to Register as a Trial / Standalone or Network Client.
6. Choose Standalone and Paste in the appropriate key.

Use this licence key to install your system as a Standalone - you will not have to reregister.  
Do not use your system more than 3 times in any 200-hour period times on your old machine as this will lock up both machines.  
Once you have installed Liberate on your new machine transfer the databases from your old machine to your new machine
